

Specification

ESD Small Size keyboard (Wired & Wireless)

- The anti-static keyboard uses a new anti-static ABS raw material injection molding production process. The test results are not affected by environmental temperature and humidity. It is not a surface coating, truly permanent anti-static, and will never wear out. The anti-static performance test complies with the international electronic industry standard (ANSI/ESD S20.20).

01 Product Specification

Part Number	011-0252 (Wired) 011-0253 (Wireless)
Surface Resistance	10e4-10e9 ohm
Tribo-charging Voltage	<100v
Electrostatic Decay Time	1000v/100v <1.0S
Material	ESD ABS
Cable Connector	USB (Wired) USB (Wireless)
External Dimensions	307*127*27mm
Color	Black
Features	Permanent Antistatic
