

Specification

Anti-Slip ESD Foam Mat

01 Features

- The product is a two-layer composite of upper green and lower black. The green surface is a diamond (square) shape pattern. It has good anti-slip properties, oil resistance, acid and alkali resistance, aging resistance, flame retardancy and other characteristics.
- The thickness of the green surface layer is 1mm, the wear resistance is good, and the use time is long. The green surface resistance is $\leq 10e8\Omega$, the black conductive layer is $\leq 10e5\Omega$, the decay time is less than 1.5s, the tribo-charging is less than 100V, and the antistatic service life is long.
- Product specifications: 1.2m*10m*2mm 1.0m*10m*2mm
